

Kids' screen time is expected to **increase 5x** due to COVID-19.

How can parents help protect their children from excessive exposure to non-academic sites, and bring back balance?

4 tips to combat screen time overload

TIP #1

Make them aware of the downsides of excessive online presence

HOW CAN YOU DO THIS?

Begin early at a young age! Talk to them about the dangers of the online world. Discuss how much is enough, followed by educating them on using the internet safely.

TIP #2

Block inappropriate websites by using a content filter on the home internet network

HOW CAN YOU DO THIS?

Leverage the various content filtering tools and internet safety features provided by a WiFi router with parental controls to block access to harmful content.

TIP #3

Install a 'child-safe' internet browser

HOW CAN YOU DO THIS?

Browsers like Maxthon Kid-Safe Browser and KidSplore come with pre-approved websites and games only.

TIP #4

Create a separate child account on your devices

HOW CAN YOU DO THIS?

Both desktop and mobile devices have options to quickly create a separate user account for kids, without the need for any additional software.

When it comes to the safety of children in the online space, having control over your home WiFi network is extremely important.
